
Deck Builder Catalog

20 representative slide forms

macOS stable · Windows beta

01

Narrative Structure

Slides are selected by content relationship.

Pick the form before writing slide text.

The builder is a constraint system, not a decoration layer.

Representative pages

Default

1

Primary builder per slide

Fallback

0.5x

Bullets stay rare

Fallback Bullets

- Use when no stronger content relationship exists.
- Keep each item short.
- Split slides before shrinking below readable size.

Release Comparison

Area	macOS	Windows beta
Generate	Verified	Verified in Windows CI
Polish	Verified	Script included; target QA pending
Render QA	Verified	Adapter included; target QA pending

Format Decisions

2-column table

Use deflist when the left column is only a label.

Donut label

Put the numeric value in the category label.

Fixed template

Ask before redesigning externally mandated layouts.
